**Re: Palm Beach Country Estates Water Main Improvements
LBFH Project No. 77-0361-03**

Dear Property Owner,

As you are aware, installation of new water mains has commenced in Palm Beach Country Estates to provide water service to the residents. Additionally as part of the construction project, per Palm Beach County Fire Code, fire hydrants will be placed throughout Palm Beach Country Estates at a maximum separation distance of 500 feet in order to provide fire protection.

The notice to proceed for this construction contract was issued to the Contractor on June 14, 2006 and the entire project is anticipated to be completed by February 9, 2008. However, this project has been broken down into three separate "Milestones" or phases and it is anticipated that after construction has been completed in a Milestone and all necessary testing and paperwork has been completed, we intend to submit to the Palm Beach County Health Department for that portion of the water main project to be released to be placed into service. Therefore, although exact dates cannot be determined, it is the intention that Milestone 1 and Milestone 2 will have water service available prior to February 9, 2008.

Should you have any further questions please feel free to contact (772) 219-2953.

Sincerely,

LBFH, Inc.
